PROFILE

I started my career as a mechanic and warehouse worker in the automotive industry. That background taught me how to break down problems, follow procedures, and ship results, skills I now apply to building software. Today I'm Full-Stack Developer and CTO at Vanirix, where I lead the development of Vanirix Orbital Command, a tools platform for SEO, analytics and business intelligence. I enjoy building real things people can use: SEO and analytics tools, video conferencing apps, REST APIs and AI experiments.
